Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

Upgrade in the rating of bank facilities of Home First Finance Company India Limited (HomeFirst) factors in significant improvement in scale of operations supported by branch expansion with improvement in geographical diversification for three years ended March 31, 2025. For three years ending March 31, 2025, HomeFirst's assets under management (AUM) grew at a robust compound annual growth rate (CAGR) of 33%, rising from ₹5,380 crore in FY22 to ₹12,713 crore in FY25. This growth was supported by continued branch expansion and deeper market penetration across multiple states. The rating also factors in the company's strengthened capital position, following a successful equity infusion of ₹1,250 crore via a qualified institutional placement (QIP) in April 2025. This has led to a notable improvement in the company's leverage, with gearing reducing to 2.6x. Profitability remains healthy, with a return on total assets (ROTA) of 3.41% in FY25, supported by controlled credit costs (0.26%) and a diversified funding base. Asset quality remains stable, with Gross Stage 3 (GS3) assets at 1.7% as on March 31, 2025. The company's lender base is well-diversified, with funding sourced from banks, National Housing Bank (NHB), and capital securitisation as on March 31, 2025, at competitive rates.

However, the rating remains constrained by relatively moderate seasoning of the loan portfolio, given the high growth trajectory in recent years. As the portfolio matures, greater visibility on long-term asset quality trends is expected. However, the lower softer delinquencies compared to peers provide comfort. While the share of top three states in the loan book declined from 64.3% in FY22 to 55.8% in FY25, Gujarat continues to account for a ~29% of the AUM. Continued expansion into newer geographies, particularly in southern and northern India, is expected to further reduce this concentration.

While the company's focus on salaried borrowers (~68% of the portfolio) provides some stability, underlying borrower segment primarily comprises low-income individuals, which may be more susceptible to economic shocks. The company's ability to maintain asset quality and operating efficiency as it scales further will remain a key monitorable.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors: Factors that could individually or collectively lead to positive rating action/upgrade:

- Significant scaling up AUM and improvement in seasoning.
- Significant improvement in geographical diversification.

Negative factors: Factors that could individually or collectively lead to negative rating action/downgrade:

- Deterioration in asset quality with GS3 over 3%
- Moderation in profitability with ROTA less than 2% on a sustained basis.
- Increase in gearing levels (debt to equity) beyond 5x on a sustained basis.

Analytical approach: Standalone

Outlook: Stable

The "Stable" outlook factors in the continuation of growth in portfolio and improvement in asset quality. Going forward, continuation of growth momentum and diversification in borrowing profile, comfortable capital and earnings growth will be a key monitorable.

Detailed description of key rating drivers:

Key strengths

Comfortable capitalisation levels

Since inception, HomeFirst has demonstrated a consistent ability to raise capital at regular intervals, supported by a strong and reputed investor base. As of March 31, 2025, the company's key shareholders include established private equity investors such as True North Fund V LLP (7.50%), Aether Mauritius Limited (5.0%), and Warburg Pincus LLC (10.7%, through Orange Clove Investments BV), who have infused growth capital from FY17–FY21. Further strengthening its capital position, HomeFirst successfully raised ₹1,250 crore through a QIP in Q1FY26, enhancing its net worth from ₹2,520 crore in March 2025 to ~₹3,750 crore in April 2025. The capital adequacy ratio (CAR) stood comfortable at 32.84% (March 2024: 39.48%) and Tier 1 CAR stood at 32.47% (March 2024: 39.08%) as on March 31, 2025, which is substantially above the regulatory requirement for housing finance companies (HFCs). While gearing stood at 3.8x as of March 31, 2025 (up from 3.5x in FY24), the recent equity infusion has brought it down to a comfortable 2.6x as of April 2025. CARE Ratings Limited (CareEdge Ratings) expects leverage to remain comfortable below 4.5x in the near term. Comfortable capitalisation is likely to enhance the company's ability to fund its estimated growth.

Diversified resource profile

As of March 31, 2025, the company's funding mix comprised 60% bank term loans (March 2024: 60%), 2% loans from NBFC (March 2024: 2%), 16% NHB refinance (March 2024: 18%), 2% Non-Convertible Debentures (March 2024: 3%), 14% Direct assignment (March 2024: 14%), 3% Co-Lending (March 2024: 3%) and 3% ECB (March 2024: 0%). During FY25, the company raised ₹5371.28 crore, which included direct assignment (DA) sanctions of ₹663.19 crore and co-lending sanctions of ₹153.31 crore. HomeFirst strategically utilized DA transactions to bolster liquidity and capitalize on lower interest rates. CareEdge Ratings notes that the company intends to maintain its current funding mix, as it supports effective asset liability management (ALM).

Growth in the scale of operations over the years

In the last three years ending March 31, 2025, The company's AUM grew at CAGR of 33% to ₹12,713 crore supported by small base and favourable growth prospects of affordable housing finance sector. Of the total AUM, 85% comprises home loans and the remaining 15% as loan against property (LAP). In FY25, HomeFirst disbursed ₹4,805 crore loans with a monthly average run rate of ₹400 crore compared to ₹3963 crore in FY24 with a monthly average run rate of ₹330 crore. The company also continued to expand its operational footprint, increasing its branch network to 155 (PY: 133) and growing its employee base to 1,634 (PY:1,249), reflecting its commitment to scaling operations in a controlled and sustainable manner.

Comfortable profitability metrics

The company demonstrated sustainable profitability and improved credit costs in FY25. In FY25, the company reported a net interest margin (NIM) of 5.2% in FY25, compared to 5.8% in FY24, with the moderation primarily attributable to a rise in the cost of funds. The operating expense/avg. assets improved to 2.6% in FY25 (FY24: 2.9%) led by economies of scale. The credit costs improved to 0.26% in FY25 (FY24: 0.31%). Return on Total Assets (ROTA) remained healthy at 3.41% in FY25, albeit slightly lower than 3.76% in FY24, but continues to reflect a strong and sustainable profitability profile. RONW stood at 16.24% in FY25 as compared to 15.54% in FY24. Going forward, the ability of the company to maintain healthy profitable metrics while maintaining the credit costs and operating expense would be a key monitorable.

Stable asset quality

HomeFirst's portfolio mix has been largely stable through the years with the company mainly lending towards retail affordable housing. The credit underwriting policies remain conservative with 68% of the AUM comprising salaried borrowers and the self-employed segment forming the rest. Asset quality stood comfortable with a GS3 ratio of 1.70% as on March 31, 2025 (March 2024: 1.70%). The Net Stage 3 (NS3) ratio stood at 1.3% as March 31, 2025 (March 2024: 1.20%). Early delinquency indicators remained largely stable, with the 1+ days past due (dpd) book at 4.5% (Mar-24: 4.2%) and the 30+ dpd book at 3.01% (Mar-24: 2.81%). While asset quality metrics remain under control, CareEdge Ratings notes that maintaining these levels will be a key monitorable as the company continues to scale its operations.

Experienced promoters and management team

Manoj Vishwanathan, Managing Director and CEO, has a total experience of over 27 years and possess extensive experience in consumer lending, encompassing sectors such as automobile loans, mortgages, and unsecured lending. At HomeFirst, he is assisted by a team of experienced management professionals to run the company's day-to-day operations. Deepak Satwalekar is the chairman of the board of HomeFirst. The company's board of directors include nominee directors from existing private equity

(PE) investors, True North and Warburg Pincus. The company has a strong focus on technology, building digital capabilities and management information systems.

Key weaknesses

Geographical concentration despite improvement

Majority portfolio as on March 31, 2025, is concentrated in Gujarat consisting of 29% AUM followed by Maharashtra- 14% and Tamil Nadu- 13% as on March 31, 2025 compared to 31% AUM in Gujarat followed by Tamil Nadu- 14% and Maharashtra- 13% as on March 31, 2024. Improvement was observed in the concentration with shift in focus towards less concentrated states for the last four years, however, Gujarat continues to dominate geographical concentration. In FY24, the company expanded within the same states venturing into new Tier2 and Tier 3 cities. Going forward, growth in AUM is expected to be contributed by expansion in markets of Andhra Pradesh, Uttar Pradesh, Tamil Nadu, Madhya Pradesh, and Rajasthan.

Moderate seasoning of portfolio and exposure to under-banked segment of borrowers

HomeFirst caters to the affordable housing segment and started operations in FY10 with 71% cumulative disbursements made in the last four years. The company's AUM grew at a 3YCAGR of 33% as on March 31, 2025. The sanctioned tenure of the home loans is 16-20 years forming 68% of the total AUM with behavioural maturity of the loans being 6-7 years, and thus, sustenance of the portfolio's asset quality is yet to be witnessed. As such, seasoning of the portfolio is improving though it remains moderate. Customers in the affordable housing segment are from economically weaker, low-to-middle income segments, having an annual household income of less than ₹60,000, who are vulnerable to economic downturns and increases risk for maintaining asset quality especially in times of stress. Of the AUM, ~90% have a fixed obligation to instalment ratio (FOIR) of less than 50%. New to-credit customers form ~14% of the total AUM. This is partly offset by the higher share of the relatively low-risk segment of salaried borrowers in HomeFirst's portfolio, secured nature of the asset class with lower loan to value ratio (LTV) and conservative lending practices.

Liquidity: Strong

As on March 31, 2025, there are positive cumulative mismatches across the time buckets. The company has contractual debt repayments of ₹1,926 crore upto one year, against which, there are expected inflow from advances of ₹1,639 crore. The company has maintained liquidity (unencumbered) to the tune of ₹1,252 crore in the form of fixed deposits, bank balances and liquid investments to overcome the above mismatch. Above this unencumbered liquidity, HomeFirst also maintained undrawn lines of ₹1215 crore as on the same date, further strengthening its liquidity buffer. As a policy, HomeFirst always maintains liquidity to the tune of 15 months of debt repayment.

Environment, social, and governance (ESG) risks

The company has a ESG Execution Team and is led by management team members and the team. A monthly ESG dashboard is reported to the management team to track progress of ESG-related initiatives. Quarterly updates of ESG plans and status updates are shared in the Board Meeting. The ESG policy is also reviewed annually for changes. The company had received an ESG rating from Morningstar's Sustainalytics (a leading ESG rating agency) with a risk score of 16.2 in low-risk category against majority BFSI Peers in the medium-to-high-risk category and had received S&P ESG Rating with a score of 46. The company remains committed to promoting financial inclusion through affordable housing finance. In the year, the company had disbursed loans worth ₹4,805 crore for affordable housing that has enabled 20,000+ families in the economically weaker section and low-income groups to realise their dream to own a home.
